# DEALING WITH DATA

- Our Apps Contains Code + Data

- Code is The Lines You Write To Manage and Deal With This Data

- To Structure The Data We Need To Categorize [Num, String, Booleans]

- Num => Students Age, Students Phone Number, Teachers Salaries

- String => Students Name, Teachers Name, Events Name

- Booleans => Teacher Got Salary Or No, Students Age Is Suitable or No

- Data is Stored on Computer Memory

- We Use Variable To Refer To This Data

- Variables Not Containing The Data Its Only Refer To Its Location on Memory

- Code is Using The Data To Perform Operation [Add, Edit, Delete]
